

COPPER ALLOYS 2024

Conference Programme

Stockholm, Sweden, 08-09 October, 2024

Invitation

Copper Alloys 2024: International arena for scientific and technical development – forum for copper alloys industries, universities and research institutions.

Copper Alloys is the biggest and broadest scientific forum focusing on copper materials sciences. The conference in 2024 aims to further strengthen the copper and copper alloys community by providing up to date research and reflecting necessary R & D approaches against the background of actual megatrends.

The growing awareness for the need to deal with resources more responsibly, environment stability and health protection, as well as the unsecure geopolitical situation, has driven society, politics, and legislation to change agenda priority settings. Circular economy, fossil free energy, green deal, total defense, and other keywords represent this new paradigm, putting high pressure on industry and science to propose and develop innovative solutions.

In response to related challenges, emerging applications and processes are needed, and universities, research institutes and market players along value chains must further strengthen their common efforts. The evolving materials research and development platforms put high demands on optimizing and complementing processing methods, closing gaps in global material flows and implementing loss-free recycling technologies.

Copper Alloys 2024 will give a comprehensive look at challenges and developments of copper user industries and will allow active sharing of knowledge and opinions.

Welcome to Stockholm!

GENERAL INFORMATION

Registration fees

The registration fee: EUR 950 excl. VAT
For students: EUR 250 excl. VAT
Early bookings with a 15 % discount are open ti

The fee includes conference participation, documentation, lunches, refreshments and conference dinner.

Registration

Use the online registration form for attendee registration and for booking hotel rooms – see our website www.copperalloys.eu

Cancellation and refunds

Cancellation before September 1st, 2024 will be refunded. Thereafter 100 % of the conference fee wil be invoiced. Participation can be transferred to a colleague. Register before September 1st, 2024.

Language

The congress language will be English.

Location

The conference will take place October, 8th to 9th, 2024 at the Clarion Hotel Sign, Östra Järnvägsgatan 35, Stockholm, Sweden.

Congress Topics

The focus of the conference this year is on:

- the importance of copper materials for a sustainable future
- the topics of material design and characterisation
- casting and parameters
- innovative joining techniques
- material analysis and digitalisation
- material processing

REGISTRATION DEADLINE

September 1st, 2024

EXHIBITION & SPONSORING

We are offering sponsorship initiatives designed to strengthen your company's image. For further details please contact the congress office or visit our website www.copperalloys.eu.

SCIENTIFIC COMMITTEE

International scientific committee

Wilhelm Erning, BAM, Germany

Ralf Feser, Fachhochschule Südwestfalen, Germany

Joacim Hagström, SWERIM, Sweden

Frank Mücklich, Saarbrücken University, Germany

Klaus Ockenfeld, Kupferverband e.V., Germany

Inger Odnevall, Stockholm University, Sweden

Lorenzo Omodei, Trafilerie Carlo Gnutti, Italy, representing CEN

Kevin Ogle, ParisTech Chemistry, France

Paolo Piccardo, Genova University, Italy

Michael Pohl, Bochum University, Germany

Olivier Rod, SWERIM, Sweden

Roberto Spotorno, Genova University, Italy

Ladji Tikana, Kupferverband e.V., Germany

14.55

Coffee Break sponsored by Otto Fuchs Dülken GmbH & Co. KG

| ROOM 1 10.30 Welcome – opening of the conference ROOM 2 | | | | | |
|--|---|------|---|--------|--|
| 10.30 Welcome - opening of the conference 10.45 Material challenges due to electrification of heavy duty vehicles and the role of copper L. Annergren. Manager for materials technology of Scania, Sweden 11.30 Investigation of Copper Alloys after Pressure Hydrogen Charging J. Jürgensen, Ruhr-University Bochum, Germany 12.15 Lunch Production & Manufacturing Chair: Christian Blecking 13.15 Definition of a Process chain for Additive Manufacturing of Copper Components H. von Lintel, K. Johns, Institute of Moterials Design and Structural Integrity, University of Applied Sciences Osnabruck, U. Krupp, Steel Institute, RWTH Aachen University, Germany 13.40 Additive Manufacturing of Copper Alloys for High Temperature Applications E. Medicalf, University of Birmingham, UK 13.40 Additive Manufacturing of Copper Alloys for High Temperature Applications E. Medicalf, University of Birmingham, UK 13.40 New Avenues in Direct Printing of Copper for Electronics via Drop-on-demand Molten Metal Jetting, N. Gilans, University of Nottlingham, UK 14.05 New Avenues in Direct Printing of Copper for Electronics via Drop-on-demand Molten Metal Jetting, N. Gilans, University of Nottlingham, UK 14.05 Investigations on the processability of copper-ratic alloys using wire and arcbased additive manufacturing processes M. Schap, T. Ungethürn, H. Ch. ROOM 1

New Alloys and Material devlopment (continue)

Chair: Charlotta Obitz

12.45 Alloy development of a dezincificationinhibiting brass for the manufacturing of brass instruments

<u>S. Berndorf</u>, S. Guk, U. Prahl Technical University Freiberg, Germany

13.10 Identification of lead-free CuZn-Alloys for Lock Cylinder Manufacturing

K. Brans¹, M. Meurer¹, T. Bergs^{1,2}
¹Manufacturing Technology Institute (MTI) at RWTH Aachen University, Aachen, Germany
²Fraunhofer Institute for Production Technology IPT, Aachen, Germany

13.35 Computer simulations for Cu-based Alloys - Beyond traditional CALPHAD

<u>Å. Jansson</u>, H. Mao, Y. Tang, S.Jin, C.-M. Lancelot, A. Malik, Q. Chen, Thermo-Calc, Sweden

14.00 Using additive manufacturing to process precipitation-strengthened high conductive copper alloys

A. Hariharan¹, H. von Lintel², K. Eichmann², L. Mielewczyk³, S. Hausdorf³, J. Grothe³, K. Jahns², U. Krupp¹
¹Steel Institute, RWTH Aachen University, Aachen
² Institute of Materials Design and Structural Integrity, University of Applied Sciences Osnabrück, Osnabrück
³ Institute of inorganic chemistry, TU Dresden, Dresden

ROOM 2

Historical and Future aspects

Chair: Paolo Piccardo

12.45 Timeless corrosion: modern understandings applied to the diagnosis of cultural heritage artefacts

R. Spotorno¹, F. Boragina¹, C. Criaco¹, P. Piccardo¹, J. Tabolli², A. Salvi³, V. Basilissi⁴, L. Rivaroli⁵

¹Università degli studi di Genova, Italy

²Università per stranieri di Siena, Italy

³Soprintendenza Archeologia Belle Arti
e Paesaggio per le province di Siena,
Arezzo e Grosseto, Italy

⁴Istituto Centrale per il Restauro, Italy

5LR restauro, Italy

13.10 Importance of modern and classical investigation techniques to understand ancient metallurgy

<u>P. Piccardo</u>, University of Genova, Italy R. Spotorno, M.E.T.A.L., Italy

13.35 Reconstruction and Casting of a Late Roman Dodecahedron

<u>J. Hoyer</u>, G. Fuchs, Technical University Munich, Germany

14.00 New approach for Low Budget Electrification of Railways

F. Dschung, Furrer+Frey Bern, Switzerland; M. Hecht, TU Berlin, Germany

14.30 Final remarks, closing of the conference
